Ottawa Boom Lift Ticket

Ottawa Boom Lift Ticket - Boom Lifts are a table lift piece of equipment which could be lifted or lowered to varying heights, making this apparatus a useful tool for many manufacturing purposes. There are some unique types of Boom Lift consisting of knuckle booms, scissor platform lifts, and aerial platform lifts, each operating differently.

The common aerial lift variation is often utilized at snowboarding lodges to transfer people who are not comfortable with the snowboard lift. Working in a manner analogous to that of an elevator, snowboarders are transported up the mountain gradually, stopping at stations along the way until they access the peak. Aerial platform lifts are also used in construction, transporting people securely up and down the sides of multi-level construction sites.

Scissor jacks are also in the boom lift class. They are utilized regularly by service providers as an ideal way to permit employees to complete maintenance and repair on wires and cables that are attached to poles. Phone, cable television and power companies have relied on the efficiency of this type of boom lift for years.

The knuckle boom jack is made for use within areas of rough ground and where the need to reverse direction might be necessary. This style of boom jack has the capability to fit in tight spots where a scissor lift cannot fit. Working among numerous machines in a production plant or in close proximity sandwiched between two walls, the knuckle boom also features a standard table equipped with rails for security and worker safety.

Depending on the job requirements and the nature of work to be completed will ascertain the appropriate model of boom jack to opt for. Fortunately, there is a version suited for practically any purpose.
