

Ottawa Aerial Lift Training

Ottawa Aerial Lift Training - An aerial work platform is a mechanized access platform. This device provides access to otherwise not accessible areas for equipment or people. Also referred to as an aerial device or elevating work platform, the machine is normally used to be able to access high places. Maintenance and construction staff usually must use aerial work platforms on the job. Firefighters utilize them for emergency access.

The aerial work platform is designed to temporary application, providing access to high areas. They are meant to be operated by one person, with the capability of lifting weights of less than one ton. Several types have higher load limits. There are various kinds of aerial work platforms; like for instance, there is a "scissor lift" and a "cherry picker".

A lot of the aerial work platforms are equipped together with electrical outlets or compressed air connectors for power tools. For specialist tasks, like for example lifting frames for window glass, an aerial work platform could come with special equipment.

Anybody required to operate an aerial lifting machine needs training, along with their supervisors. Members of Health & Safety Committees and representatives responsible for inspecting aerial machine work areas also need to go through training. Individuals training will become familiar with how to utilize an aerial lift device. They would likewise gain an understanding of the rules which apply to the safe use of these devices. Regulations vary from province to province, and in worksites which are federally regulated.

Anyone who is required to work near or lifted by an aerial lifting machinery needs to be informed about potential hazards. In a general safety session, an Aerial Lift Training Video can be shown to educate all of the employees who are lifted by them or work near them.

Aerial Lift Training Program comprises modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Pre Operational Checks for Aerial Lift Devices; and Platform Positioning & Park Positioning. The program is intended to train staff on the safe operation of self-propelled, elevated work platforms and self-propelled, boom supported, elevated work platforms. Employees who finish the program will receive a certificate, signed by a qualified individual to confirm successfully completing a hands-on practical exam.
