## Ottawa Manlift Operator Certification

Ottawa Manlift Operator Certification - We provide an aerial lift and scissor platform certification and training to empower the trainee with the knowledge and general understanding of the efficient and safe use of "Power Operated Mobile Work Platforms," based on the existing regulations in the industry. Upon successful completion of training, those participating will be able to understand and recognize particular safety and health related dangers connected with using scissor and aerial lifts.

There are different affiliated locations in your district offering Manlift Operator Certification Programs. Trainees are provided with in-depth instruction about safe operation and regulations together with extensive hands-on training. The knowledge and skill level of each and every trainee is evaluated and individuals who can demonstrate an acceptable level of operational competence will be given employee documentation and Operator Certification cards.

Theory Training
The trainer would help the one training through a review of the theory training using numerous visual aids. The one training will work out of a manual that includes all the necessary rules. Other subject matters such as safe operating measures, various machine kinds including various sizes and associated applications, pre-use inspections and general work place safety are individually explored.

Theory Evaluation
The Theory Evaluation begins with a written test based upon the concepts covered in the operator's reference guidebook. These tests are graded and returned to the ones training. After that the exams are reviewed to ensure understanding and a minimum score of 70 percent is needed in order to pass this portion of the training.

Practical Training
The practical training is included in the hands-on portion. It is here that the ones training are shown the safe operating procedures, like the parking and shutdown measures and the pre-use check procedures. Every trainee has the chance to operate the equipment and practice the skills they learned during Theory Training under the course trainer's helpful eye in an environment that is safety controlled.

Practical Evaluation
The Practical Evaluation is where the ones training are evaluated to assure they have reached a minimum level of skill. The ones training are then assessed on an individual basis using the machinery in a reasonably difficult course setting. As soon as the assessment is done, the ones training are de-briefed and given the opportunity to address whichever problems they may have regarding whatever portion of the program. Each successful trainee's employer would be sent the official documents and records shortly after the course has been finished.
