

Ottawa Counterbalance Forklift License

Ottawa Counterbalance Forklift License - When operated by fully trained operators, forklifts could become a major advantage for companies and firms. We can offer your employees a comprehensive training program which consists of all parts of operating a powered lift machinery. Counterbalance forklift training provides forklift operators with the understanding and practical skills required to operate forklifts efficiently and safely. The program offers a combination of classroom theory, participant observation and hands-on training in a warehouse-type setting. Training could be on site and/or customized.

The course covers the fundamentals of powered lift trucks, like for instance rules and regulations, components, factors affecting stability and load centres. General operating procedures are taught, such as startup, circle check, forward/reverse on level ground, shutdown, and operating around other people. Load handling subject matters comprise selection of loads, load pickup and placements, loading and off-loading trailers and load security and integrity. Participants will learn operational maintenance procedures, like recharging and refueling. Workplace safety concerns would be talked about. Participants will learn about the environmental conditions affecting lift truck performance and be able to identify potential dangers. Advanced training on propane handling can be incorporated.

Both employees and employers could face severe penalties if national and industry rules are not followed in the operation of forklifts. Workers who operate a reach truck or forklift must be well-informed concerning the guidelines about their safe operation. Training is recommended for anyone applying for work which requires forklift operation.

We offer hands-on training and in-class theory within small, personalized classes. Training options comprise entry level or refresher courses.

Entry-level Course Outline:

For anybody entering the workforce as a counterbalance forklift operator, this training course is for you. The successful student must pass a series of practical and written tests to be able to complete the program. Topics consists of: general operating procedures; fundamentals of powered lift trucks; operational maintenance; load handling; basic rules and regulations, workplace safety.
